RUSSIAN ARMY SWEEPING ON TO HUNGARIAN PLAINS

Catastrophic Gain Said to Have Been Made in the Direction of Gimmerno.

BIG AUSTRIAN LOSSES.

Germans Send Reinforcements to Defend Usok Pass—

Move on Rakowka.

LEMBURG, Galicia, April 11 (Associated Press).—The Russian armies, according to dependable information reaching London, have made successful advances along the whole front from Hatfield to Lemberg, the greatest gain being in the direction of Gimmerno.

At this point the Russians descended the southern slope of the Carpathians, forcing the Austrians back with heavy losses to the line between Rakowka and Usok. At the same time the Russians advanced along the line between Usok and Rakowka, where the Austrians, unable to make a serious defense, abandoned their stores and transports in their retreat.

The most determined opposition on this whole line of battle was on the part of the Hungarians, whose fighting qualities are being highly complimented by Russian officers.

PETROGRAD, April 12 (United Press).—On a 200-mile battle front leading along the Carpathians and to a point near the Rumanian border the Russians are now everywhere on the offensive, according to a statement given out here today.

While the campaign for the invasion of Hungary is making progress the extreme left flank of the Slav army is preparing for important operations in the Carpathian region.

The exact nature of these operations was not stated, but it is reported that another invasion of Bukovina at two separate points is about to begin.

The Germans have brought up more reinforcements, both to the defense of Usok Pass and in the broad valley of the Stryk, protecting the Vereske Pass. In the Usok the fresh troops of the enemy have been sent to the front in an effort at an offensive movement. Their attacks have been beaten off with ease and the Russians continue to make progress in this region.

In their offensive toward Usok the Russians are now moving along both sides of the Lemberg-Ungvár Railway. Their advance south of Usok threatened the right wing of the Austro-Germans in this sector and forced the enemy to redistribute his forces.

The Austro-German right wing fell in toward the railway, the Russian left in this sector making an advance of more than a mile.

VON BERNSTORFF'S NEW NOTE WAS ORDERED BY BERLIN GOVERNMENT.

WASHINGTON, April 12.—German Embassy officials stated today that the Ambassador acted under instructions from the Berlin foreign office in presenting the recent note or memorandum to the State Department, complaining that while the United States had failed to maintain its right to export foodstuffs to Germany, American manufacturers were permitted to continue shipping munitions of war in unlimited quantities to Great Britain and her allies.

Some question had arisen as to whether Count von Bernstorff, the Ambassador, acted on his own authority, since the document, a diplomatic "memorandum," was phrased by the Embassy.

The memorandum, delivered some days ago, was made public last night by the Ambassador. He explained that he did so without arrangement with the State Department, recalling that the Department itself recently published the American note to Germany on the Bryce case, though there was no agreement for its simultaneous publication in Berlin.

WAR HOLDS UP KAISER'S PRIZE FOR SONG FESTIVAL IN BROOKLYN, COPY SENT.

BERLIN, April 12 (via wireless to Sayville, L. I.).—Emperor William's promise to the Brooklyn singing festival of the Northeastern Singing Society of America has been completed, it was announced today. To avoid possible capture by British warships, an imitation will be forwarded to Brooklyn, the original to be sent after the war.

The Emperor's gift is a large silver and gold-plated shield of honor, with rich relief work, after models drawn by Prof. Otto Rohloff. It represents Apollo playing a harp. Over all are the American and German coats-of-arms and the Emperor's picture.

Back From Pottle Attempt to Enlist at Seventy.

Among the steeplechase passengers on the French liner Niagara arriving today was Franz Cholley, seventy, a farmer from the province of Quebec, a veteran of the Franco-Prussian war. He left New York on Aug. 29 on the Chicago with the intention of enlisting in the French army. For nearly six months he had tried to break into the army, but was turned down because of his age. He says he will try to enlist in Canada.

VON HINDENBURG POKES FUN AT NEW KITCHENER ARMY

"He Has a Million Soldiers, but No Real Fighting Force," Says Field Marshal.

"A UNIFORMED CROWD."

"Officers Are 'Non-Coms' and Lack the Experience of the Germans."

BRUSSELS, via wireless to Sayville, L. I., April 12 (United Press).—Gen. von Hindenburg, hero of the Marston battle, told a neutral correspondent that he has no fear of Lord Kitchener's new army raised along the Franco-Flanders battle line.

Kitchener has a million soldiers, but no real army," said von Hindenburg. "He has just a uniformed crowd. The officers and non-coms lack the experience of German officers, who have generations of military training behind them."

Gen. von Hindenburg praised the Russian soldiers as good fighters, but said their bravery was a consequence of blind obedience to the commands of their superiors and not in response to individual intelligence, as in the German army. The Russians, he said, learned many lessons from the Japanese war, particularly the science of trench building, but outside the trenches, he said, they were badly off.

"Nobody need fear the Russian superior numbers," said von Hindenburg. "It is an old story that numerical superiority does not decide battles. At Tannenberg the Russians were three-fold as strong as the Germans, but nevertheless we annihilated them."

"We have observed many unflinching signs that the Russians are becoming exhausted. Their war material is being terribly wasted. The manner in which they fight indicates clearly that the war cannot last long."

LONDON, April 12.—According to the Tribune, England has laid down a new battleship which will be by far the most powerful craft afloat. It will mark a change in battleship construction, exceeding that which came when the first dreadnought was built. It will necessitate the adoption of new methods in battleship construction and will halt the construction programme of the United States.

It is stated that this great new ship will be 800 feet in length, will carry six 18-inch guns and have the wonderful speed of forty knots.

At present the Queen Elizabeth, now at the Dardanelles, is the most powerful engine of war afloat. She is 260 feet in length, but carries eight 15-inch guns. She is oil-driven, as the new ship will be. In the craft now planned armament is sacrificed for increased speed. The increased length gives the great boiler and engine room capacity needed to produce such speed.

ONLY TEN MEN LEFT OUT OF TWO COMPANIES THAT ATTACKED FRENCH.

PARIS, April 12.—There has been given out in Paris a description by an eye-witness of the attempt made by the Germans on April 8th and 9th to retake a small fort at Beaulieu held by the French.

Two companies of volunteers led in this attack. They showed an absolute contempt for death. Only a few of them escaped.

Another attack, in which the Germans paid a heavy price, was successful in capturing the first line of trenches. These positions were held by two companies until April 9th.

The Germans were so thick in these trenches that they crowded each other and interfered with the freedom of operations. Into this mass of men the French artillery fired. Those who escaped the shells were mostly bayoneted by the French infantry. Only ten men survived.

WAR WILL END ON MAY 1 IF THIRD VISION OF GIRL IS AS TRUE AS OTHER TWO.

PARIS, April 12.—Much excitement has been aroused in the northern district by a story which the Journal des Debats says army automobilists have investigated and found to be true.

A seven-year-old girl awoke on Palm Sunday and told her mother she had seen the Virgin Mary, who said she would soon be dead, that she would arrive within three days and that the war would be ended on May 1.

Two of the three prophecies have been fulfilled. The girl is dead and news of the wounding of her father was received within the time she specified.

GERMANS MAKE LIGHT OF TALK ABOUT WAR WITH THE HOLLANDERS.

BERLIN (via wireless to Sayville, L. I.), April 12.—Reports "cabled to English newspapers to the effect that Holland and Germany were nearing an open break, were written by an English first lieutenant, according to the Amsterdam newspaper Tijd.

"There are still officers with the time to write foolish articles instead of to fight," commented the Amsterdam paper.
